# **WE ALL WANT JUST ONE THING: TO INCREASE PROFITABILITY.**

Digitisation is changing the way we live and work. Digitisation means efficiency, and serves to simplify processes and design them in a more results-optimised way. Transport is analogue and will remain so, but fleet management is being digitised. MAN DigitalServices helps with optimising business processes, reducing fuel and administrative costs, planning and managing service work on the bus, time management, and ongoing driver training. After all, MAN DigitalServices serves a single purpose: helping you improve your company's profitability. Isn't that great news?

**The digital services available support you with the economic and efficient management of your fleet in the following areas:**

- Basic equipment
- Vehicle location
- Economical driving
- Maintenance and repair management
- Battery management
- Tachograph and time management
- Driver assistance

FOR THREE, FOR FREE:  
MAN DIGITALSERVICES.

TEST NOW  
FOR THREE  
MONTHS FREE  
OF CHARGE!

This is the perfect time to seize the opportunity: test MAN DigitalServices now for three months free of charge! Our test offer applies to the following paid digital services: Geo, Perform, Compliant, MAN ServiceCare M, Timed and MAN eManager M. The digital services MAN ServiceCare S, MAN eManager S, the MAN Driver app and Pocket Fleet are already free of charge and are therefore not included in the offer.

**Benefit from:**

- Efficient fleet management with digital services that make your work considerably easier
- Our offer now at zero cost and with zero risk: your free trial period ends automatically after three months with no further obligation

The test offer\* applies to all vehicles\*\* in your fleet within the booking period. Begin straight away: With just a few clicks, you can test the benefits of MAN DigitalServices for your entire fleet – and we are certain that they will win you over.

**[www.man.eu/marketplace](http://www.man.eu/marketplace)**

\* Applies to all customers who are not yet signed up to any paid MAN DigitalServices

\*\* Where technically feasible

An aerial photograph of a city, likely New York City, showing a dense urban grid. A glowing cyan grid is overlaid on the image, consisting of lines and circular nodes that trace the city's streets and major thoroughfares. The grid is most prominent in the upper right and lower right quadrants, with a few lines extending into the center and left. The city buildings are in shades of grey and brown, and a dark area, possibly a river or harbor, is visible in the lower left and center.

**KNOW WHERE IT IS.**

**THE EXACT LOCATION, NOT JUST A ROUGH GUIDE.**

## Geo

**Geo** is a comprehensive digital compass for your vehicle fleet. You have a complete overview and full transparency when it comes to all vehicle locations – for intelligent route planning and optimisation, as well as long-term storage of driving history for later evaluation.

- Driving history for the last 25 months to identify optimisation potential in driving performance
- Shortened GPS tracking interval (20 seconds) for precise location retrieval
- Reliable, efficient route planning with comprehensive map material
- Individual points-of-interest and geofence set-up
- Simple sharing of vehicle positions with your customers via link

## Perform

**Perform\*** provides a detailed overview of your fleet's operational data, which facilitates comparison and evaluation. Driver performance can therefore be assessed without bias, we help you reduce fuel consumption and vehicle wear, and CO<sub>2</sub> emissions and overall operating costs can be minimised.

- Informative vehicle analyses to identify uneconomical driving behaviour
- Facilitates comparable driver evaluations for your fleet

\* Only available in full for MAN Lion's Coach and NEOPLAN. Basic information available for all other vehicles.

**YOU ENSURE THE BREAKS.**  
**WE ENSURE THE DOCUMENTATION.**

## Compliant

**Compliant\*** supports you with legal requirements placed on bus companies to regularly record and store tachograph and driver card data. This routine is automated and data are always stored in the cloud for retrieval.

- Record and store tachograph and driver card data automatically
- Straightforwardly archive driving and operational data

\* Not available for the MAN Lion's City E.

## Timed

The purpose of **Timed** is the forward-looking management of driving and rest periods, as well as break, on-call and work times. This is essential for efficient route and job planning and to avoid expensive driving time violations.

- Clear presentation of driving and rest periods
- Individual, efficient operational and route planning thanks to to-the-minute transmission of driver activity

**WE TAKE CARE OF THE MAINTENANCE AND SERVICE.  
YOU HAVE ENOUGH TO DO.**

## MAN ServiceCare S (free of charge)

**MAN ServiceCare S** is the free entry point into digital maintenance and repair management for your MAN and NEOPLAN fleet. Your MAN service outlet will proactively inform you about upcoming maintenance work and coordinate the workshop visit. With forward-looking planning, appointments can be intelligently bundled. In addition, the nearest MAN service outlet can review relevant vehicle details in the event of a breakdown and provide more targeted support.

- Increased vehicle availability thanks to optimised maintenance status of your vehicles
- Overview of information relevant to maintenance
- Time savings thanks to outsourcing of the administrative burden to your MAN service outlet

## MAN ServiceCare M

**MAN ServiceCare M** includes all the services of the S package, as well as additional functions for added flexibility and customisation. You always have a detailed overview of the status of individual components to hand thanks to the extended system access and comprehensive maintenance information. In addition, you can manage your own components and vehicles from other manufacturers (FMS data). When the time comes, you decide whether you will conduct the maintenance yourself or whether you will hand this over to your MAN service outlet.

- Increased flexibility and customisation when maintaining your fleet
- Enhanced transparency thanks to detailed information on maintenance requirements

We are already further developing MAN ServiceCare with preventive functions so that your vehicles can spend the maximum time possible ready for action.

The availability and scope of MAN ServiceCare depend on the vehicle model.

Maintenance and  
repair management

# MAN DRIVER APP.

Makes driving easier.

DOWNLOAD FOR  
FREE NOW.

Available on the  
Google Play

Download on the  
App Store

## MAN Driver App (free of charge)

The **MAN Driver app** makes everyday driving more digital and therefore easier. It helps with departure checks and damage reports, in the event of a breakdown and in finding MAN service outlets.

- Free digital assistance for bus drivers
- Guided departure checks including checklist
- Network the driver, vehicle, fleet manager and MAN service outlet (e.g. ability to transmit damage reports to MAN ServiceCare)

## Pocket Fleet (free of charge)

Whether it is live data, driver activity or availability: with the RIO Service **Pocket Fleet**, you always have an overview of all your vehicles and drivers, including the most important status information (depending on the order) – in a modern and appealing presentation. The free RIO telematics app makes controlling your fleet management on the go a fun experience.

- Access to the most important fleet information
- The application is available for Android and iOS users in the Google Play Store and Apple App Store, respectively

**YOUR PERSONAL eMANAGER.  
E FOR EFFICIENCY.**

## MAN eManager S (free of charge)

With the free **MAN eManager S**, you control your charge management and the prior temperature optimisation of your MAN Lion's City E simply and efficiently. Specify a time when your vehicle or the entire electric bus fleet should be ready for use and thus 100% charged using the timer mode in accordance with the driving timetable.

- Real-time overview of charging status, range and time of complete charge
- Prior climatic temperature optimisation
- Choice of immediate charging or timer module

## MAN eManager M

On top of the basic package, the **MAN eManager M** features additional functionalities to optimise everyday operation and the efficiency of your electric buses. In addition to charge management, a comprehensive array of data relating to the battery are available for detailed vehicle and battery monitoring. It is also possible to identify which vehicles are on the road, driving or stationary. You thereby have a view of your entire fleet at all times.

- All MAN eManager S functions
- Historical analysis for vehicle and battery monitoring
- Detailed insights into daily charging and discharging procedures, air conditioning, outside temperature, and energy consumption

# THIS IS HOW IT WORKS – SO SIMPLE AND SIMPLY INGENUOUS.

1.

Register on the  
RIO platform at  
[www.rio.cloud](http://www.rio.cloud)

2.

Store vehicles with an  
installed and activated  
telematics box

3.

Order the desired digital  
services

4.

Mobile transfer of  
vehicle and maintenance  
information to RIO cloud

**That is how you increase the efficiency of your vehicle fleet in just a few simple steps.**

If you have any questions regarding MAN DigitalServices, please contact the MAN DigitalServices experts by telephone on **00800 63444825** (weekdays 8 a.m. to 5 p.m.) or send an email to **[digitalservices@man.eu](mailto:digitalservices@man.eu)**.

The portfolio of MAN DigitalServices is integrated into the cloud-based RIO ecosystem. The MAN Marketplace on the RIO platform at **[www.man.eu/marketplace](http://www.man.eu/marketplace)** offers you access to the digital services that you can use via a suitable telematics box in your vehicle.
